## PROJECTS

### HOSPITAL MANAGEMENT SYSTEM

Developed a Hospital Management System in C and C++, streamlining patient management, appointments, billing, and inventory. Implemented user authentication for data security, optimized performance, and received positive user feedback. Future plans include expanding features with electronic health records and data analytics.

### UNIVERSITY MANAGEMENT SYSTEM

Developed a University Management System in Java, seamlessly integrated with MySQL for efficient academic and administrative operations. Achievements include an intuitive user interface, enhanced data security, and improved system efficiency. Future plans involve expanding features to include online resources and student performance analytics.
